Hunter Douglas designs premium, intelligent window fashions that combine gorgeous fabrics with smart technology to beautifully transform natural light, enhance your home's interiors and make everyday living easy.

As the industry leader in innovation, we offer control systems so advanced that your shades can be scheduled to automatically adjust to their optimal positions throughout the day, creating the perfect balance of light and privacy—morning, noon and night. Many of our products also provide additional energy efficiency and child safety benefits.

With Hunter Douglas window fashions, you can live beautifully in extraordinary comfort, convenience and style.

Expertly crafted to capture, manage and transform light

We believe in light's powerful influence. Natural light is known to help increase productivity, elevate your mood and even improve your health. Light can also beautifully transform your home's interiors. Hunter Douglas shade designs are uniquely constructed to alter incoming light to create ambiance in a room, while simultaneously maintaining views to the outside and privacy inside the home.

Choose sheers or other select styles designed to diffuse and draw light deeper into a room, illuminating your home naturally. Discover styles with room-darkening or blackout options, designed to provide more privacy. Or, explore Hunter Douglas products that offer ultraviolet protection to help counter sunlight's harmful effects on furniture, artwork, fabrics and floors.

Energy-efficient designs that create superior comfort

When we introduced the industry's first cellular shade, Duette® Honeycomb Shades, Hunter Douglas became a pioneer in energy efficiency. We are also the first manufacturer to receive certification for interior window coverings from the Attachments Energy Rating Council (AERC). The AERC provides consumers with third-party verified information about the energy performance of residential window treatments.

In addition to Duette shades, Hunter Douglas offers energy-efficient styles in a range of insulation levels. Many of these styles are designed to help lower your energy consumption and costs, whether it's reducing heat loss in the winter or solar heat gain in the summer.

Our sheers beautifully harness natural daylight, drawing it deeper into a room and therefore reducing your need for artificial lighting. By tilting louvers and panels in our custom shutters, you can direct incoming light where it's needed most. And, our honeycomb shades are specially engineered to provide outstanding insulation for year-round comfort.

The industry's finest fabrics in on-trend colors, textures and designs

At Hunter Douglas, beauty is more than skin deep, but first impressions matter. That's why textile sourcing is a crucial part of our design process, and it's why we've established relationships with some of the world's best mills. We work with textile houses to develop and design exclusive materials that are as special as our technological innovations.

That means fabrics that subtly reflect and control light in intriguing ways. You'll find richer, more fashionable colors, luxurious weaves, unusual textures and even performance fabrics.

We created thousands of extraordinary fabric and color combinations that reflect the timeless look of handcrafted cotton, linen and silk blends to add beauty, durability and enhanced livability to every room in the house.

Automation for Smart Home Living

When your shades sync to the rhythm of your life, everyday living is more beautiful, comfortable and effortless. PowerView® Automation is the industry's most innovative technology. It moves your Hunter Douglas shades automatically, whether you're home or away, according to schedules that you set.*

Incredible Convenience

Achieve your perfect light automatically—morning, noon and night

Effortless Control

Compatible with voice assistants and many home automation systems*

Privacy and Security

Schedule shades to move automatically, when you're home or away

Energy Efficiency

Program shades to be in the best positions to heat and cool your home

Child and Pet Safety

Simple, cord-free operation

Flexible Power Options

Choose from several power options, including a rechargeable battery and hardwiring capability

*Some features require additional hardware and/or third-party equipment. Visit hunterdouglas.com for details.

The PowerView App is available on Apple® iOS and Android™ mobile devices.

A Day With PowerView®

7:00 AM Morning

Schedule shades to operate at your preferred wake-up time.

2:00 PM Afternoon

Shades adjust to protect furnishings from harsh midday sunlight.

5 Minutes Before Sunset

Based on your local sunset time, shades open to reveal your best view.

10:30 PM Bedtime

Shades lower automatically for privacy and a perfect night's sleep.

Innovative operating systems engineered to give you more

We expect more out of everything we select for our homes today. That's why Hunter Douglas offers a wide variety of advanced manual and motorized operating systems that enhance your everyday life, allowing your window treatments to look and function exactly how you need them to.

LiteRise®

This cordless system adjusts blinds and shades with a light touch on the handle or bottom rail. Push up to raise, pull down to lower—and they stay where you want them.

UltraGlide®

This revolutionary operating system uses an ergonomic wand to raise and lower window shades or blinds.

SoftTouch® Motorization

This cordless, motorized lift system is designed for simple and intuitive wand-controlled operation.

SimpleLift™

Available exclusively with horizontal blinds, this cordless system features a contoured bottom rail with a button to press for easy lifting and lowering.

Vertiglide™

Our vertical system featured on Duette® Honeycomb Shades provides cordless side-to-side operation, ideal for sliding-glass doors or as a room divider.

TrackGlide™

With Duette Honeycomb Shades on tilt/turn windows, this system keeps shades in place whether windows are closed, tilted or turned.

Duolite®

This design option gives you ultimate control over light and privacy with two separate fabrics in one shade—one sheer or light-filtering, the other room-darkening.

LightLock®

Available exclusively with Duette® Honeycomb Shades, this system features U-shaped side channels with a black ridged interior that blocks light for unparalleled darkness.

Top-Down/Bottom-Up

Maintain privacy while enjoying natural light with this system, which lets you operate window treatments from either direction.

SkyLift™

Exclusively for our honeycomb shades, this manual or motorized system makes it easy to operate shades on hard-to-reach windows and skylights.

Endless solutions for specialty shapes and hard-to-cover windows

Our wide selection of beautiful designs perfectly addresses the challenges that specialty shapes and hard-to-cover windows present in controlling light and creating privacy.

Trapezoid windows come in many configurations and angles, but we've designed for all of them. Duette® Honeycomb Shades, Pirouette® and Silhouette® Window Shadings, Vignette® Modern Roman Shades, EverWood® Alternative Wood Blinds and Parkland® Wood Blinds offer attractive options.

We also designed many clever styles for circular, oval, hexagonal and octagonal windows.

Bay windows and corners are unique architectural accents, and virtually every Hunter Douglas style offers a solution for them.

For European-style tilt/turn windows, our TrackGlide™ system keeps honeycomb shades in place, whether a window is closed, turned or tilted. Duette shades also work beautifully on skylights.

French doors offer an elegant transition between rooms and to the outdoors, and most Hunter Douglas styles accommodate them easily.

Designed with child and pet safety in mind

As children grow, their curiosity with the world around them grows as well. Basic household items, including window coverings, can turn into potential hazards.

Making window fashions that are safer for homes with infants, young children and pets is a top priority for Hunter Douglas, so we developed a wide range of products that can reduce the risk of accidents.

From PowerView® Automation to other cordless manual and motorized operating systems, we offer an array of innovative design options for enhanced child and pet safety, as well as especially easy operation.

Unparalleled quality and innovation for outstanding performance

At Hunter Douglas, we care deeply about creating best-in-class products. Choose Hunter Douglas window fashions, and you can feel confident that each is designed with exceptional quality, as well as industry-leading innovation, style and versatility.

Our products are designed and custom-assembled with relentless attention to detail. Many are also GREENGUARD Certified, indicating that they have met stringent indoor air quality guidelines, so you can enjoy beautiful window fashions that are environmentally friendly, too.

Hunter Douglas stands behind our commitment to quality, craftsmanship and innovation with our Lifetime Limited Warranty, which comes with each of our products. Your investment in Hunter Douglas is a wise one. Our beautiful designs, innovative engineering and smarter features deliver exceptional value for a lifetime.

The largest portfolio of window fashions that elevate everyday living

Dressing windows artfully and bringing light into a room beautifully can be done in many ways. Sheers and shadings are one approach to controlling light; shutters and blinds are another. The soft folds of sheers and shadings offer a clean, crisp appearance, while shutters and blinds provide a streamlined look.

Consider, too, how you live in a room, and how important privacy is. Then, factor in your personal design aesthetic, whether it be contemporary, traditional or somewhere in between. You will find that whatever you desire, we have styles for every taste, every room, every moment.

Sheers and Shadings

Turn harsh rays into soft, ambient light with these beautiful, light-transforming products.

Cellular Honeycomb Shades

Count on energy efficiency from these honeycomb shades, which also come in an extensive array of fabrics to filter light and provide beauty year-round.

Roman Shades

Always a stylish look, these shades come in soft, supple fabrics and several fold styles.

Roller and Screen Shades

These shades offer a simple, modern look and the industry's most robust fabric offering. Discover prints and patterns ranging in opacity from sheer to opaque, and 14% to 0% solar screens.

Woven Woods

Create a natural and inviting backdrop to any room with fabrics that are artistically woven from globally sourced, natural materials.

Custom Shutters

Keep the classic look of interior shutters but still have all the benefits of advanced, modern-day materials and long-lasting finishes.

Vertical Blinds and Panel Tracks

Select from wider, more contemporary fabric panels to softly curved vanes that mimic drapery, all of them ideal for wide window expanses and sliding-glass doors.

Horizontal Blinds

Handcrafted with an array of finish options in wood, alternative wood or aluminum slats, horizontal blinds offer timeless design.

Silhouette® Window Shadings

Silhouette® Window Shadings, with S-shaped vanes, help shape ambient light and shadow. This design, along with a host of beautiful fabrics, diffuses and softens harsh sunlight. Silhouette ClearView® shadings maximize your view with a unique sheer combination and superior view-through. Silhouette Halo™ shadings, our newest innovation, feature unique, dual-layer fabric vanes that rotate—up, down or anywhere in between, giving you precise light control and privacy and eliminating harsh shadowing. All Silhouette shadings feature soft fabric vanes suspended between two sheers that you can tilt to achieve your desired privacy, as well as UV protection for your floors and furnishings.

Duette® Honeycomb Shades

Offering luminous colors and crisp, consistent pleats, Duette® Honeycomb Shades are among the most energy-efficient window treatments available. Lower them completely for privacy and optimum insulation, or raise them completely for maximum light and view—they're beautiful either way. Enjoy even greater insulation with the Duette Architella® design, a state-of-the-art construction featuring three insulating air pockets that reduce heat loss and unwanted solar heat gain.
